

## Mason Monument Sign

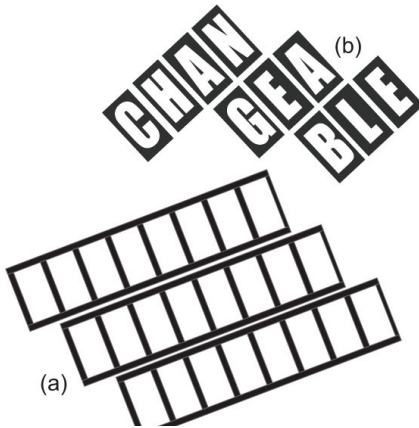

The Mason Monument Sign is delivered ready for a brick or stucco finish for a prestigious look to allow your signage to blend in with existing architecture. Popular with churches and community centres, the Mason utilizes our same patented track technology to ensure a lifetime of problem free changeable copy.

Your local SpeedPro location will be happy to provide you more information and to put together a custom quote to meet your needs.

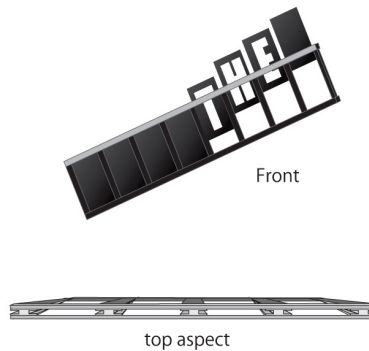

## Our Patented Track System

1. The message board is comprised of cartridge tracks (a) and letters (b).

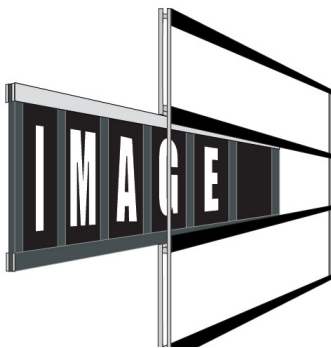

2. The letters are loaded into both sides of the cartridge tracks effectively locking the letters into place.

3. When the sign is unlocked, the message board pivots open to allow the user access to the track system.

4. The previous message is removed and the new message is simply slid into place in the message board.

5. The message board rotates shut and is locked in place.

6. Once locked, the double sided sign is tamper proof which allows it to be installed at grade levels and within the "line of sight".
