

## Messenger Monument Sign

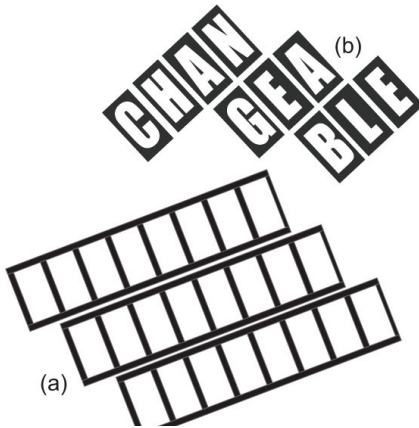

The Messenger Monument Sign is the leading performer in the **Trac Signs** series of signs. Constructed of heavy duty 6x6" square tubing and utilizing our patented track technology, this signage will provide a beautiful message board for many years.

The Messenger is the world's leading changeable copy sign and is available in a number of size configurations and letter sets. Your local SpeedPro dealer can provide you with a custom quote to meet your needs.

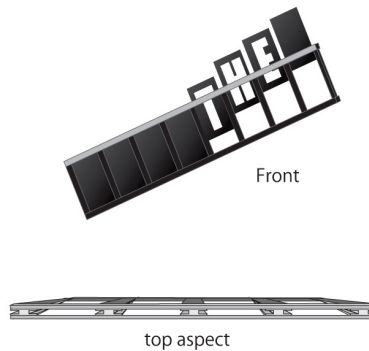

## Our Patented Track System

1. The message board is comprised of cartridge tracks (a) and letters (b).

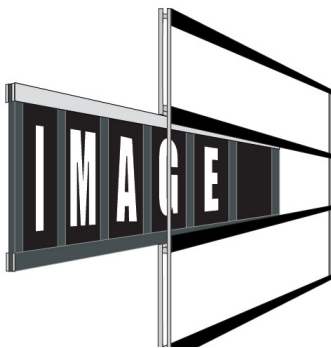

2. The letters are loaded into both sides of the cartridge tracks effectively locking the letters into place.

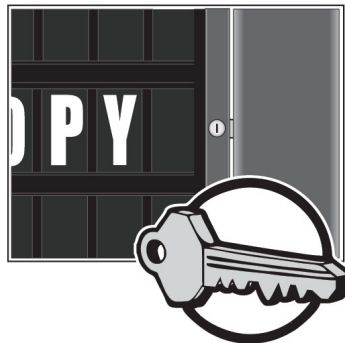

3. When the sign is unlocked, the message board pivots open to allow the user access to the track system.

4. The previous message is removed and the new message is simply slid into place in the message board.

5. The message board rotates shut and is locked in place.

6. Once locked, the double sided sign is tamper proof which allows it to be installed at grade levels and within the "line of sight".
